

2023 AT A GLANCE

Here are some of our accomplishments from 2023. To learn more about any of these areas, read our 2023 annual communication at [ninemilecreek.org](https://www.ninemilecreek.org).

**50
EVENTS**

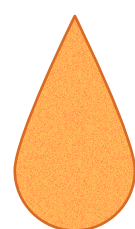

The District presented or partnered on 50 education events around the watershed. These programs reached over 3,000 people of all ages.

12

GRANTS AWARDED

The District awarded 12 grants totaling over \$109,000 in funding. Projects included shoreline buffers, raingardens, and salt reduction initiatives.

**6 LAKES
MONITORED**

All District lakes are monitored on a rotating basis. Points on the creek are monitored every year. Additionally, the District took sediment cores from two lakes.

3

LAKE STUDIES

Lake studies evaluate current water quality in lakes to identify potential management strategies for those lakes.

**152
PERMITS PROCESSED**

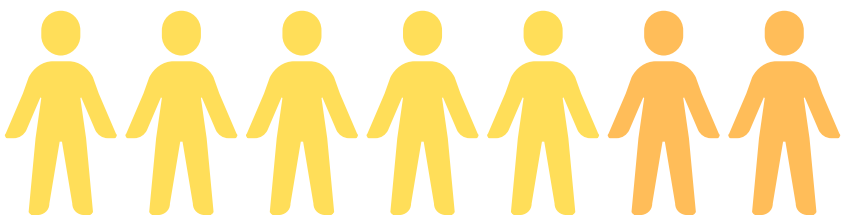

1,075

**PERMIT
INSPECTIONS**

**PROJECTS
IMPLEMENTED**

Some of the many projects implemented over the year included an herbicide treatment on Normandale Lake and streambank maintenance in Hopkins. In addition, we conducted carp and goldfish management in multiple lakes.

EXPANDING STAFFING

The District has added staffing capacity as it continues to implement projects, programs, monitoring, and other initiatives laid out in its ten year water management plan. 2023 saw the addition of a few new full-time positions, and growth of current staff into new roles.
