RE: Lake Cornelia and Lake Edina UAA update and Lake Cornelia alum treatment feasibility study

Background

Staff presented the draft Lake Cornelia and Lake Edina User Attainability Analysis (UAA) study reports (both the whole report and executive summary) at the Board's June 19, 2019 regular Board meeting. As a result, the board directed staff to finalize the study and to authorize the engineer to complete a feasibility study for a fall 2019 alum treatment on Lake Cornelia, and to bring both back to the Board's July 17, 2019 regular Board meeting to act on.

Request

Accept the final report and the feasibility study for the alum treatment on Lake Cornelia, schedule a public hearing for the project and authorize the administrator to publish notice of the public hearing once each week for two successive weeks before the date of the hearing in NMCWD's legal newspaper.
