Permit Inspection Report

Summary

As this month was short and included Thanksgiving, MAWD, and snow, fewer inspections were completed. Follow-ups and sites with a ranking score of 4-6 were the concentration. On the results of many inspections, I have notes of concerns to check after this season's snowmelt because many features were invisible under the snow cover. There is a category below to account for the areas which could not be inspected because of closures.

- Number of inspections: 30
- Number of sites removed: 6
- Number of sites to remain in queue with no issues observed: 21
- Number of sites inspected but project not started: 0
- Number of sites with inspection attempted (closed for weather): 2
- Number of sites with action or follow up required: 1
