Permit Erosion/Sediment Control Inspection Report

Summary

Due to the amount of office work needed to move unprecedented amount of people through permitting, I was unable to complete many typical inspections this month, unfortunately. We have received a new permit application on 73% of the working days this year.

One scheduled inspection was completed for the Hennepin County Medical Examiner's site in Minnetonka (permit 2019-117). Temporary stabilization was found to be sufficient and well done as the property is handed back to Hennepin County. Closeout after stabilization is likely to be completed in the spring.

Total: 6

No issues: 2

Not started: 2

Issues: 2

Permit	Location	Issue	Action
2021-33	27 14 th Ave N, Hopkins	Perimeter protection needed on 13 th and 14 th Aves N	Report sent to applicant
