# MEMO

**TO: Nine Mile Creek Watershed District Board of Managers**  
**FROM: Randy Anhorn**  
**DATE: March 10, 2021**  
**RE: Barr Technical Support and Oversight for RFPs**

## **Background**

At the Board's January 7, 2021 special meeting, the Board discussed diversifying its use of consultants for specific stand only projects.

In looking at the District's 2021 workplan, the Board thought the going out for a request for proposal (RFP) for the upcoming stabilization/restoration of the south fork of Nine Mile Creek and the development of wetland restoration/protection plans for the high-quality wetlands identified in Barr's high-quality wetland restoration and protection opportunities analysis, would be good projects to seek RFPs from the engineering pool.

The Board also discussed the need for technical support and oversight to help develop and review the RFPs to ensure the District is getting what it wants, and to help provide peer review of the end products.

## **Request**

No action required. The presented is to provide an update on using Barr engineering for technical support and oversight for the RFPs.
