RE: Barr Engineering Scope of Work for Lynmar Basin Stormwater Retrofit Concept Plan

Background

As you are aware, the District and the City of Edina are initiating the public participation process to obtain public feedback on current uses of Bristol & Mavelle Park to help in the development of concept plans for a stormwater BMP to be constructed in the park to address localized flooding and reduce nutrient loading to Lake Edina (listed as impaired by the MPCA due to excessive nutrients).

Following initial meetings with City of Edina staff and residents around Bristol & Mavelle Park, a couple of preliminary concept plans will be developed (with estimated costs and benefits) and brought back for feedback and eventual refinement.

The final conceptual design and cost-benefit analysis will be brought back to the City of Edina City Council and NMCWD Board of Managers for review.
